UP TO 50% FUNDING FOR AI SKILLS

Flexible AI Upskilling Fund

Supporting SMEs in the Professional and Business Services Sector by match-funding (up to 50%) AI skills training for their employees.

Funding can be spent on training that supports employees to develop their technical skills and/or understanding of AI to be able to develop, deploy or use AI in their role.

Applicants must be registered and operate in the UK, be in existence for at least one year, employ between 1-249 employees and be defined as an SME and operate in the Professional and Business Services sector.

Firebrand have partnered with Microsoft to create learning paths that will supercharge AI skills within your business:

INTRODUCTION TO AI

For those looking for the fundamentals of AI.

- AI-900: Azure AI Fundamentals
- MS-4004: Empower your Workforce with Copilot for M365 Use Cases
- MS-4005: Craft Effective Prompts for Copilot for M365

AZURE TECHNICIANS

For Azure Technicians looking for more technical skills.

- AI-900: Azure AI Fundamentals
- AI-102: Azure AI Engineer Associate
- MS-4006: Prepare your Organisation for Copilot for M365

AI ADVANCED

For people with understanding or experience with Azure AI.

- AI-102: Azure AI Engineer Associate
- AI-050: Develop Generative AI Solutions with Azure OpenAI Service

INTRODUCTION TO AI

By having staff complete the MS-4004 and MS-4005 courses focused on Copilot for Microsoft 365, your organisation can enhance productivity, streamline business processes, and improve decision-making through effective use of AI tools.

These courses teach employees to craft effective prompts and leverage AI insights, fostering a more innovative and efficient workforce. Additionally, the AI-900 course provides a foundational understanding of Azure AI, equipping employees with critical skills in artificial intelligence that prepare them for advanced roles, enable adaptation to AI trends, and give your business a competitive edge in technological innovation.

Together, these courses significantly contribute to operational efficiency and technological proficiency in your organisation.

MICROSOFT COURSES

AI-900 – Microsoft Certified: Azure AI Fundamentals
You'll learn the fundamentals of artificial intelligence (AI) and how Microsoft Azure services can be used to design and establish AI solutions.

MS-4004 - Empower your workforce with Copilot for Microsoft 365 Use Cases
One day course, is composed of two parts - Getting started with Copilot for Microsoft 365 and Empower your workforce with Copilot for Microsoft 365 Use Cases.

MS-4005 - Craft Effective Prompts for Copilot for M365
You will discover ways to craft effective and contextual prompts for Microsoft Copilot for Microsoft 365 that create, simplify, transform, and compile content across Microsoft 365 applications.

AI ADVANCED

Completing Microsoft courses AI-102 and AI-050 equips individuals with advanced skills in Azure AI and generative AI technologies, enabling organisations to innovate and maintain a competitive edge. Certified professionals enhance an organisation's ability to design, implement, and manage efficient AI solutions, leading to cost reductions, improved operational efficiencies, and enhanced decision-making capabilities.

Such training ensures that a business stays current with technological advancements and industry standards, fostering innovation across various departments and potentially opening up new revenue streams.

Additionally, the credibility and networking opportunities provided by these certifications can lead to collaborative growth and sustained business success.

MICROSOFT COURSES

AI-102 - Azure AI Engineer Associate
You'll get the skills and knowledge you need to be a successful AI Engineer. This course teaches you how to implement solutions that use Cognitive Services and Bots in Microsoft Azure and also covers monitoring.

AI-050 - Develop Generative AI Solutions with Azure OpenAI Service
You'll understand how Azure OpenAI Service provides access to OpenAI's powerful large language models such as ChatGPT, GPT, Codex, and Embeddings models. These models enable various natural language processing (NLP) solutions to understand, converse, and generate content. Users can access the service through REST APIs, SDKs, and Azure OpenAI Studio.
